LOTHAR E.S. BUDIKE, JR.

Page 223

1   Q.   You showed them the

2   operation of the software, is that a fair

3   statement? You put on a screen, for

4   example, on the calculation on the --

5   A.   It was all live.

6   Q.   A calculation -- you

7   showed -- you did a calculation on the

8   screen for them?

9   A.   We did -- we did -- we

10   showed them the software and we operated

11   it live, all the functions of the

12   software.

13   We did not provide them

14   code, because code is kind of useless.

15   It's kind of -- code is code. If the

16   programmer knows Java, he'll write the

17   application in Java. If he knows C++,

18   he'll write the application.

19   Q.   On how many occasions did

20   you show them the software?

21   A.   I gave them passwords and

22   built them their own site to have over

23   many months. So they had open access to

24   a website that was posted that had their
